    Problem Statement :- Web solution for help of startups growth

GitHub Repository Link:- [Lokesh-malviya/Destroyer (github.com)](github.com)

Description:-

In our web solution our team has tried to present a web solution which will help a lot of startup ideas to get funds and investment. We decided that in the left corner we will present all the startups with a list view and will have the option to filter them according to the latest startup, growing startup, and innovative startup these filters will help the investors to sort the startups of the people.Let's see the right side of our web page that will show the information, work done by the startup and their future plans and their will also be an option for the fund /investment for any investor.
